

FRANK PEPPER

Project Management SME for **course**
development: field delivery, AI-driven project
systems, and video production

Kamloops, BC
250-815-0170
sdrmaster@outlook.com
[linkedin.com/in/frankmpepper](https://www.linkedin.com/in/frankmpepper)
Remote • up to 20 h/wk

I've run crews, managed subcontractors, and scheduled work on job sites across BC and Alberta for twenty years. More recently I've founded two ventures and designed VantageOS, an AI-native project management platform for construction and public infrastructure: task lifecycles, risk engines, stage gates, lessons-learned capture, and human-in-the-loop controls for AI agents. I also hold a diploma in Sound Design for Visual Media and have shot and edited field footage professionally. For Robertson's Project Management course I can bring the theory, the jobsite examples, and the recorded audio and video.

PMI contact hours	30.25 PDUs
Field leadership	20+ years
Ventures founded	GroNorth, VantageOS
Certificates	133 listed
Media training	VFS diploma, 2015
Availability	Immediate

POSTING REQUIREMENTS

QUALIFICATION FIT

REQUIRED	PMP or CAPM certification	GAP
I don't hold a PMP or CAPM. I have 30.25 PMI PDUs / contact hours from 27 courses by a PMI® Registered Education Provider (#4101), which is more than the 23 hours of project management education the CAPM requires. That includes Project Management Foundations and its Schedules, Budgets, Requirements and Ethics courses. I have also completed Coursera's Foundations of Project Management, Project Initiation and Project Planning, and I bring 20+ years of delivering projects in the field.		

REQUIRED

Strong understanding of Project Management and PMBOK

EVIDENCE

VantageOS models the PM lifecycle as software: charters and missions, task states (todo → in progress → review → blocked → done), risk registers, stage-gate approvals, and a retrospective and lessons-learned module. Formal coursework: 30.25 PMI PDUs, including Project Management Foundations with its Schedules, Budgets, Requirements and Ethics courses; Coursera's Foundations of Project Management, Project Initiation and Project Planning, and LinkedIn Learning's Project Management Foundations, Business Benefits Realization and Agile Requirements Foundations. The course framework below is organized by PMI process group.

REQUIRED

Knowledge of and experience with managing projects

STRONG

20+ years delivering projects on site: custom homes on Vancouver Island, a large retirement-community build in Vernon, Western Canada relocations as **Moving Foreman** (2008–2012), and 4–5 tree-removal projects a month as **Ground Lead**. Founder of GroNorth (2019–present).

ASSET

Facilitating workshops or training on PM

EVIDENCE

Designed a **Supervisor-Trainer model** with a standardized training curriculum and SOPs for a scaling field-services business. Ran tailgate safety meetings and trained crew members on site. Completed **Virtual Training for Sales Trainers and Coaches**, and PowerPoint Essential Training for building course decks.

ASSET

Using AI to manage projects

STRONG

Designed **VantageOS**, an AI-native project operating system. AI agents triage risk, draft mitigation plans and flag schedule drift. Every critical action goes through deterministic gates and human approval, with an append-only audit log. I can teach both what AI does well in project work and where it needs guardrails. Coursework includes LinkedIn Learning's **Big Data in the Age of AI** and the 23-hour **Become a Data Scientist** path.

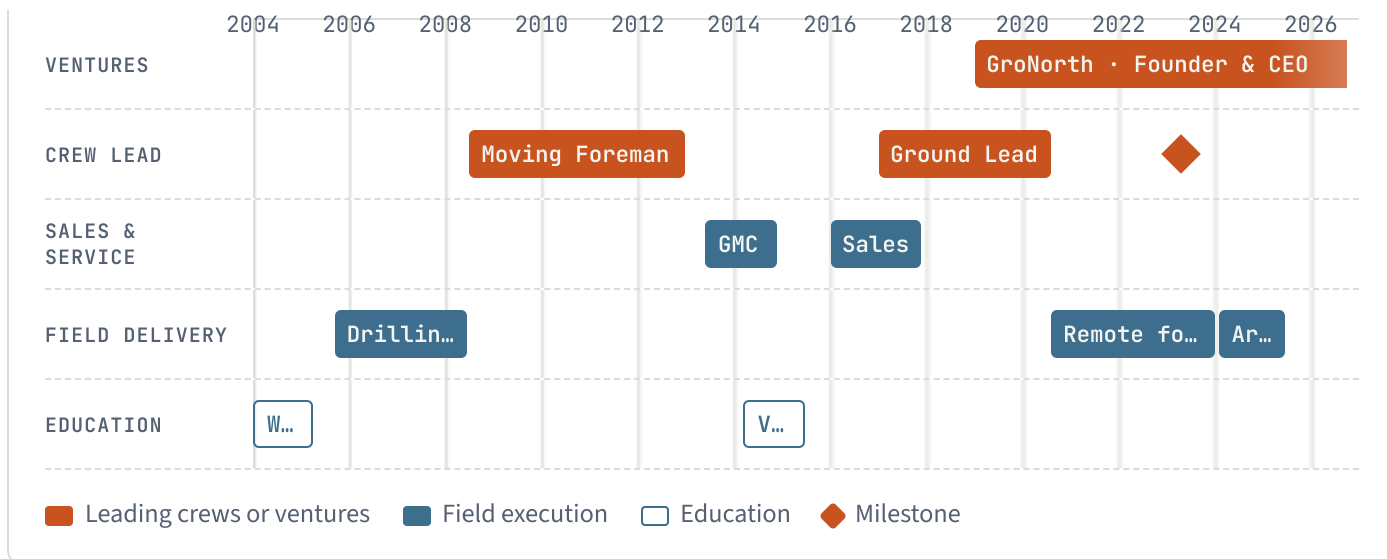

ASSET	Developing training programs or courses EVIDENCE Wrote a three-level training curriculum (Technician → Lead Technician/Trainer → Operations Supervisor) so business knowledge lives in documented processes. The draft course framework on this page is a working sample.
REQUIRED	Analytical and critical thinking STRONG Wrote long-form strategy and feasibility analyses: the VantageOS strategic thesis on Canadian infrastructure procurement, and a VK Accelerate business plan with SWOT, market research and financial projections.
REQUIRED	Written and verbal communication STRONG Wrote investor memos, stakeholder briefs and technical references. Handled client communication on every job site. Produced narration and audio post-production as a trained sound designer.
REQUIRED	Time management, prioritization and deadlines STRONG Remote forestry work on 4:00 AM to 7:00 PM days in unpredictable coastal conditions, and 10+ hour rig shifts. Home builds delivered on schedule and on budget.
REQUIRED	Collaborative team player STRONG Worked in two-person falling crews, on rig crews, and as lead coordinator for multi-trade subcontractors. At VantageOS I worked across product, finance and compliance.
REQUIRED	Legally eligible to work in Canada CONFIRM Confirm your status here. The posting asks for documentation.

2004 - 2026 • SELECT A BAR

DELIVERY TIMELINE

My career laid out as a Gantt chart. Each bar shows the role and the project management practice it gave me.

Founder & product lead ·
2026-present
Kamloops, BC

VantageOS

- Designed an AI-native project operating system for construction and public infrastructure, with risk, compliance, change management and safety modules on one shared project record.
- Specified a mission and task lifecycle (brainstorm → plan → execute; todo → in progress → review → blocked → done) with priority triage and dependency tracking.
- Built governance for AI agents: routine actions run automatically, higher-risk actions need peer or consensus review, and critical actions need human sign-off recorded in an append-only log.
- Wrote a 24-month phased roadmap, a retrospective and lessons-learned module, and an investor thesis on the Canadian infrastructure procurement market.

PM PRACTICE Integration, risk, change control, stakeholder engagement, AI in project work

General Labourer / Loader
Operator · Feb 2024 – Jun
2025
Kamloops, BC

Art Knapp Plantland

- Ran loaders and forklifts for seasonal setup and material logistics.
- Supported hardscaping, seasonal retail builds and customer service during peak months.

PM PRACTICE Seasonal planning, operations support

Fellow • 2023 – present
International Sustainable
Development Resource
Centre, Geneva

Power Saw Operator • 2017
– 2023
Port Renfrew & Streamline
Logging, Vancouver Island

Founder & CEO • Jul 2019 –
present
Kamloops, BC • Lewes, DE

ISDRC Next Generation Leaders

- Selected for a fellowship on systems innovation for sustainable development.
- Took part in policy forums and climate-health dialogues.

PM PRACTICE Cross-sector stakeholder work

Shake blocking & hand falling

- Organized remote camp logistics and helicopter sling-load staging on 15-hour days.
- Assessed terrain, planned falling and mitigated hazards on slopes too steep for machines.
- Bucked logs to mill specification and kept all saws, rigging and safety gear in working order.

PM PRACTICE Logistics, schedule pressure, hazard control

GroNorth

- Founded and lead a vertical-farming venture focused on food security and climate resilience.
- Directed R&D for modular systems designed for scalable deployment in resource-limited regions.
- Led the company end to end: inception, product development, fundraising, team leadership and direction.
- Wrote a VK Accelerate business plan for a related field-services venture, including SWOT, market research, cash-flow projections and a Supervisor-Trainer staffing model.

PM PRACTICE Initiating, business case, resource planning, stakeholder management

Ground Lead & Climber •
2017 – 2020
Vancouver Island, BC

Danger-tree removal • Chris Davidson, Certified Faller

- Ran ground operations on 4–5 projects a month: rigging plans, rope management, drop zones and debris clearance.
- Planned falling and escape routes, and assessed hazards on tight residential and commercial sites.
- Produced all media: camera and GoPro capture, plus editing footage for documentation and promotion.

PM PRACTICE Risk assessment, work planning, video documentation

Finance Manager • Jul 2016
– Nov 2017 • Direct Sales
• Jan – Jul 2016
Edmonton, AB

Carco Auto Credit • Upstat Marketing

- Senior Sales Consultant and Finance Manager at a high-volume subprime dealership. Submitted and funded the most deals with TD, SDA, Cofinco and First Access.
- Ran the full sales process on my own, from cold call to delivery, processing 5+ new credit applications a day.
- Before Carco, ranked as a top performer in door-to-door sales of Telus Home Services for Upstat Marketing.

PM PRACTICE Pipeline management, stakeholder negotiation, deadlines

Diploma, Sound Design for
Visual Media • 2015
Vancouver, BC

Vancouver Film School

- Graduated top of class.
- Trained in field recording, post-production audio, mixing and syncing sound to picture. This is the skill set behind Robertson's course video and audio deliverables.

PM PRACTICE Course media production

Service Advisor • Jun 2013
– Nov 2014
Lloydminster, AB

Westridge GMC

- Diagnosed likely vehicle issues with customers and dispatched work orders to mechanics.
- Kept customers updated on the status of their vehicles and resolved their concerns.

PM PRACTICE Work intake, dispatching, status reporting

Moving Foreman • Jul 2008
– Dec 2012
Lloydminster, AB

Power Play Moving

- Led residential and commercial relocations across Western Canada.
- Supervised the crew and handled all customer relations.
- Prepared delivery schedules and organized the crew for each move.
- Planned loads and rigging, and secured high-value freight.
- Managed customer service on site and kept trucks and equipment maintained.

PM PRACTICE Crew leadership, logistics planning, client communication

Motorhand / Derrick Hand •
2005 – 2008
Tempco, Ensign,
Trailblazer, Partner
Drilling

Oilfield drilling & servicing

- Worked on conventional, coil-tubing and top-drive rigs on 10+ hour shifts.
- Earned First Line Supervisor, H2S Alive, Confined Space, Fall Protection and Blowout Prevention tickets.

PM PRACTICE Procedure discipline, safety-critical teamwork

2004 – 2005
College of the Rockies •
Lakeland College

Welding programs

- Basic Welding (2004) and Pre-Employment Welding Foundation (2005). Top of class in both.

PM PRACTICE Technical training

“PROJECT MANAGEMENT” COURSE FRAMEWORK

A starting framework I'd bring to the first meeting. It follows the PMI process groups and PMBOK® Guide principles. Every module pairs one video with an assessment modelled on a real PM task.

MODULE 1 OF 8 • CONTEXT

FOUNDATIONS OF PROJECT WORK

LEARNING OUTCOMES

- Define projects, programs and operations
- Compare predictive, agile and hybrid life cycles
- Explain the PM role and PMBOK® principles

AUTHENTIC ASSESSMENT

Choose a life cycle for a given scenario and justify it in a one-page memo.

VIDEO SEGMENT

On a job site: the same build run three ways. Why the life cycle choice matters.

AI IN PRACTICE

Where AI assistants fit across the life cycle, and where they don't.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

MODULE 2 OF 8 • INITIATING

INITIATING & STAKEHOLDERS

LEARNING OUTCOMES

- Write a project charter
- Build a stakeholder register and power/interest grid
- Set success criteria

AUTHENTIC ASSESSMENT

Draft a charter and stakeholder register for a community renovation case.

VIDEO SEGMENT

Walking a real client brief through to a signed charter.

AI IN PRACTICE

Using AI to draft a charter, then checking the draft critically.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

SCOPE & THE WBS

LEARNING OUTCOMES

- Gather and trace requirements
- Decompose scope into a WBS
- Write a WBS dictionary entry

AUTHENTIC ASSESSMENT

Build a WBS to level 3 with dictionary entries for three work packages.

VIDEO SEGMENT

Breaking a house frame into work packages, on location.

AI IN PRACTICE

Prompting for a WBS and spotting what the model misses.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

SCHEDULE

LEARNING OUTCOMES

- Sequence activities and dependencies
- Find the critical path
- Read and build a Gantt chart

AUTHENTIC ASSESSMENT

Build a network diagram and Gantt chart, and identify the critical path and float.

VIDEO SEGMENT

Critical path on a whiteboard, then the same schedule in software.

AI IN PRACTICE

How AI schedule-risk tools flag drift.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

COST & EARNED VALUE

LEARNING OUTCOMES

- Estimate and build a cost baseline
- Calculate PV, EV, AC, CPI and SPI
- Forecast EAC

AUTHENTIC ASSESSMENT

Write an EVM status report from a mid-project data set.

VIDEO SEGMENT

Why the project is 'on budget' but still in trouble: EVM in ten minutes.

AI IN PRACTICE

Automated variance alerts and when to override them.

Deliverables: 1 recorded video (narration mixed in-house) • slide deck to Robertson brand • curated readings • assessment brief + rubric

RISK & UNCERTAINTY

LEARNING OUTCOMES

- Identify, analyze and rank risks
- Plan responses
- Maintain a live risk register

AUTHENTIC ASSESSMENT

Build a risk register with a probability/impact matrix and response owners.

VIDEO SEGMENT

Hazard assessment before a tree fall: risk planning where mistakes are costly.

AI IN PRACTICE

AI risk triage with human sign-off on high-severity items.

Deliverables: 1 recorded video (narration mixed in-house) • slide deck to Robertson brand • curated readings • assessment brief + rubric

EXECUTING, TEAM & QUALITY

LEARNING OUTCOMES

- Lead and develop a team
- Manage communications
- Apply quality assurance and control

AUTHENTIC ASSESSMENT

Write a communications plan and a weekly status update for a sponsor.

VIDEO SEGMENT

Tailgate meetings, handoffs and running a crew day to day.

AI IN PRACTICE

Meeting summaries and action tracking with AI.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

CHANGE, CLOSING & LESSONS LEARNED

LEARNING OUTCOMES

- Run integrated change control
- Close out a project formally
- Capture lessons learned

AUTHENTIC ASSESSMENT

Assess a change request and write a close-out report with a lessons-learned log.

VIDEO SEGMENT

A change order from request to approval, and what the retrospective found.

AI IN PRACTICE

Building a lessons-learned knowledge base the next project can use.

Deliverables: 1 recorded video (narration mixed in-house) · slide deck to Robertson brand · curated readings · assessment brief + rubric

RESPONSIBILITIES → HOW I'D DELIVER THEM WORKING WITH YOUR TEAM

Course framework

Draft module outcomes and sequencing with the Course Developer, then revise them against your Development and Design Framework.

Video & audio

Record, mix and edit narration and on-location segments myself using my Vancouver Film School training, so your team receives clean, finished audio.

Branded content

Source readings and build slide decks inside the Robertson Branded Style Guidelines, with citations and accessibility checks done before hand-off.

Authentic assessments

Base each assessment on a real PM artifact, such as a charter, WBS, risk register, EVM status report or lessons-learned log, and pair it with a clear rubric.

Technical questions

Answer questions from the Course Developer and Instructional Designer within one business day, with examples from real projects.

Tracking & meetings

Update the project tracking sheet as each deliverable moves, flag risks to the timeline early, and attend project meetings remotely as needed.

CONTINUING EDUCATION · 2020 - 2024

CERTIFICATES

Completed coursework from Coursera and LinkedIn Learning. 27 courses carry PMI PDUs from Registered Education Provider #4101, and each certificate shows its PMI activity number. Use the filters to see the rest. The full list is on [LinkedIn](#).

EDUCATION, CERTIFICATION, TOOLS CREDENTIALS

- 2020–24 **30.25 PMI PDUs / contact hours**
27 courses from PMI® Registered Education Provider #4101 (LinkedIn Learning), including Project Management Foundations and its Schedules, Budgets, Requirements and Ethics courses.
- 2022 **Project management coursework, Coursera**
Foundations of Project Management (ID AE23ASMP6QA6) · Project Initiation: Starting a Successful Project (ID JGT6P6KJ4XPS) · Project Planning: Putting It All Together (ID UV3MRNTHTHUL)
- 2015 **Diploma, Sound Design for Visual Media**
Vancouver Film School. Graduated top of class. Post-production audio, field recording, mixing, sync to picture.
- 2005 **Pre-Employment Welding Foundation**
Lakeland College, Lloydminster AB. Top of class.
- 2004 **Basic Welding**
College of the Rockies, Invermere BC. Top academic standing.
- 2004 **High School Diploma**
David Thompson Secondary. Student Council President and Head of the Leadership Committee.

PROJECT MANAGEMENT

- Scheduling
- Crew supervision
- Subcontractor coordination
- Risk & hazard assessment
- SOP & curriculum design
- Stakeholder communication
- Budget & cash-flow planning
- Blueprint & code compliance

AI & SYSTEMS

- AI agent workflow design
- Human-in-the-loop controls
- Task lifecycle modelling
- Risk registers & lessons learned
- Roadmapping

MEDIA PRODUCTION

- Field recording
- Voice-over & mixing
- Camera / GoPro capture
- Video editing

SAFETY TICKETS

- First Line Supervisor
- Construction Safety Training
- Fall Protection
- Confined Space
- H2S Alive
- WHMIS
- First Aid / CPR
